

Vehicle Inspection

Vehicle inspections are performed per our quality checklist. Vehicles will be inspected after pulling through the gate to the inspection area. If a vehicle fails inspection, the driver will have the opportunity to correct the problem and will be allowed to be re-inspected. NO vehicles may be removed from the trailer without passing inspection. Once a vehicle passes inspection a 2" diameter sticker will be placed on the driver's door. Different colors will be used each night.

Driver Registration

Drivers will take the completed and signed checklist up to the registration house where they will complete the registration forms or check in if pre-registered. At that time the driver will also choose a washer containing a number. This number is used to determine the first heats gate pick. Second heat pole positions will automatically be the opposite of the first heat, allowing all racers to have a front row start in one heat. A limited number of vehicles will be allowed to race in each class and this will be determined by the Race Director based on the number of total vehicles registered in all classes.

Practice Session

Driver will be allowed to take up to (3) laps, per vehicle they are racing, as a practice session. This is meant to familiarize the drivers with the track and track conditions. It is not meant to be a race or driven in an aggressive manner. Track staff will help monitor the number of laps being driven as well as watching for aggressive driving.

Driver Staging

All heats and pole positions will be posted on the board by the scoring trailer. Drivers are responsible for verifying they are in the correct heat. Classes and heats will be called to the staging area by our announcer and our staging director will send the cars to the starting area where they will be set into their starting locations by the track staff.

Starting Procedure

The starting personnel will point at each vehicle and wait for a "thumbs up" from each driver. Once all drivers are ready, the starter will raise the green flag to start the race.

Race Rules / Flag Definitions

All vehicles will race each other for the specified amount of laps. We understand there will be some bumping and vehicle contact, however we will not allow aggressive driving that is considered by our track staff to be hazardous to themselves or other drivers. If a driver is identified as driving aggressively the finish line track staff will point at the driver with a rolled or furrowed black flag. This is considered a

warning. If the aggressive driving continues, the finish line track staff will wave a black flag at the vehicle and the driver is disqualified for that heat and must pull off the track.

Track staff will use a yellow flag to signify that there is an issue ahead of them on the course. Drivers may continue but must pass through the area in a slow and safe manner.

Should the race need to stop due to a rollover, accident, mechanical breakdown, fire, etc., a red flag will be waved by track staff. At that point the racing is stopped and drivers are expected to drive back to the starting area and line up single file in the position they were in at the time of the incident.

At the start of the final lap of racing, finish line track staff will display a white flag signifying you are now on your last lap of that race.

A checked flag will be used as drivers cross the finish line at the end of the race.

Scoring

Drivers will receive (1) point for each position they finish. Your total points between the two heats will determine whether you will be in the feature or consolation event for that class. It will also be used to determine your pole position in that feature or consolation event. If there are 6 cars or less per class there will not be a consolation race and all drivers will race in that class's feature event. We will only have a maximum of 6 vehicles in each feature or consolation race. Should there be more than 12 total vehicles in a class and you not in the top 12 in points, you will not be placed in either event.

Awards

There will be trophies for the top 3 in each feature and first place for consolation race. The top 3 finishers in the feature events will exit the track to the top of the hill, exit the vehicle, and receive their awards on the victory podium.
