

ERX Snocross Requirement Checklist

Registration Requirements

- 1) Register at the race or online at www.ermotorpark.com
- 2) Have under 18 waiver completed and on file at ERX

Machine Requirements

- 1) 6" tall black numbers on white backgrounds must be placed on each side of sled.
*
- 2) Tether switch must be installed on machine.
- 3) Rear snow flap must be restrained with non-elastic material.
- 4) Traction products - track 96 studs per sled, none allowed in outside belt. Must be trail-studs, no sharpened picks or screw-in studs. Studs must meet ISR height restrictions of no more than .375" protruding beyond the highest point on the track lugs. Ski Runners – Carbides – Must be commercially available.
- 5) Clear tape must be applied over the headlight and taillight lenses.

Rider Requirements

- 1) Helmet – Snell 2000 or newer with at least 50% Blaze Orange exposure.*
- 2) Goggles or face shield
- 3) Body Armor–Tek Vest style chest protector, Sportech strongly encourages a Tek Vest protector, however will allow motocross style products as long as they provide front and back as well as shoulder protection. A limited number of Tek Vest protectors will be available for rent at the track. They are rented on a first come first serve basis.
- 4) Knee / shin guards are required. A limited number will be available for rent at the track. They are rented on a first come first serve basis.
- 5) Orange on back of jacket. You are required to have at minimum 144 sq. inches of orange along with your racing number on the back of your jacket. Bibs may also be used over your coat / jacket to meet the requirement. *

*** ERX will be offering a limited number of race starter kits that will contain an approved number plate set with numbers, blaze orange helmet decal, and an approved orange racing bib. These kits will be available for purchase at the track.**
